

ES100 “EXTREME” ADJUSTABLE LOUVRE

strength of spans for extreme shutter in horizontal position, located on a roof or wall are as follows:

2300mm - factored wind speed - 115km/h or 32m/s

2100mm - factored wind speed - 133km/h or 37m/s

1850mm - factored wind speed - 158km/h or 44m/s

1700mm - factored wind speed - 179km/h or 50m/s

consideration should be given to location; where reduced spans can be obtained for additional strength.
